

GLUCO FX

- Supports Healthy Glucose Metabolism*
- Source of Antioxidants*
- Nutrient Partitioning*

Glucose Disposal Agent

Perfecting the balancing act of carb utilization and storage depends largely on insulin sensitivity and the effectiveness with which sugars are metabolized. With the rich assortment of ingredients found in the GLUCO FX formula, the body is primed to properly absorb and store carbohydrate-rich foods. The result? Excess glucose is eliminated and the glucose that does make it into circulation can be properly stored and utilized for energy purposes; not spilled over and converted to body fat. No matter how you consume your carbs, GLUCO FX glucose disposal agent (GDA) puts glucose in its place.

GLUCO FX is designed to assist your body to more efficiently utilize the carbohydrates you consume as fuel and not store them as fat. Our bodies are energy storing machines and as we age or overeat, our bodies get more efficient at storing carbs as energy for utilization at a later date. This energy is stored as fat, highlighted in the body-conscious areas, primarily our stomach or hips. GLUCO FX assists body by shuttling these ingested carbs to muscle cells rather than stomach or hips leaving your muscles feeling fuller.*
