Taurine aids in the metabolism of fat, and is also known to improve insulin sensitivity and boost your mood! It can help improve exercise performance and body composition.

L-Carnitine enhances performance by increasing the body's reliance on fat for energy; this reduces depletion of muscle glycogen. By reducing muscle tissue lactic acid build-up, performance athletes using L-Carnitine can extend duration of muscular exertion before fatigue.

On your way to do some cardio? Need a mid-afternoon "pick-me-up"? ACUTS is designed to fit your life and your diet. Now Dye-Free!
