

D-ASPARTIC ACID

- Support Healthy Testosterone Levels
- Backed By Clinical Research

D-Aspartic Acid

ALLMAX introduces D-Aspartic Acid in a free-flowing powdered form. D-Aspartic Acid is a racemate isomer of the more common L-Aspartic Acid. Recent human clinical research using oral dosages of 3.12 g of D-Aspartic Acid indicated the benefit of maintaining Testosterone levels that are already within the normal range, where an average of 42% increase of Testosterone was observed in just 12 days.*

Testosterone has a profound effect on strength, muscle size, density, and thickness. This product helps to increase libido, a general feeling of well-being and sexual performance enhancements.*

Athletes and bodybuilders looking for a natural boost in their testosterone have found that a 2-week on and 1-week off cycle and repeat works best.*
