

TRIBX90®

- 90% Furostanolic Saponins
- Ultra-Concentrated Extract
- Bulgarian Species Tribulus Terrestris

TRIBULUS TERRESTRIS

Scientific research suggests that Tribulus increases the body's production of luteinizing hormone which in turn promotes the healthy, normal production of Testosterone, the key male hormone responsible for helping to add lean body mass, increase metabolism and support healthy libido or sex drive levels. Popular among bodybuilders, Tribulus is the perfect complement to your hardcore training regimen.*

The source herb in TRIBX90® has been wild harvested by hand at peak season (just one specific month of the whole year!) to ensure the highest levels of steroidal saponins - the most concentrated phytochemicals! Other tribulus products on the market are typically 40 to 45% saponins. Experience the power of wild crafted Tribulus backed by clinical laboratory testing; trust ALLMAX® to bring you the best quality and highest potency products available.*

**2X
POTENCY**

TRIBX90® has literally DOUBLE the bioactive phytosterol saponins at an ULTRA-POTENT 90% furostanolic saponin mark as other 45% Tribulus products so common in the market.

Supplement Facts

Serving Size 1 Capsule
